THE CAPE COUNTY HERALD, CAPE GIRARDEAU, MISSOURI SEPTEMBER 12 1918

NUMBER 36

FATHER LEVAN EXPECTS TO BE TRANSFERRED

New Catholic Ruling Forbids
Him Remain At One Place
Over 7 Years

FATHER O'BRIAN IS SENT FROM TEXAS

Sister Baptiste First To Be Re-
moved From Cape Under
Catholic Law

Rev. Father T. J. Levan, for a number of years President of the St. Vincent's College in this city, will be transferred to another institution, he has informed intimate friends.

Under the Canon law, which was adopted by the heads of the Catholics in the United States and Europe, at a conference in Paris in 1914, officials in charge of Catholic institutions must be changed every seven years. Father Levan has been President of St. Vincent's more than that number of years, and he anticipates an order to go elsewhere most any time.

Father O'Brien, Treasurer of St. Vincent's College has been transferred to the University of Dallas, a noted Catholic school at Dallas, Tex. Father Levan spent several months as the Acting President of the Dallas College last fall. When he departed for Texas at that time it was generally believed that he would not return to the Cape because of the new rule, prohibiting a president of a Catholic institution to remain longer than seven years.

Sister Baptiste, who was in charge of St. Francis Hospital here for fourteen years, was recently transferred to Milwaukee, Wis.

Her successor in the Cape has not been named, but it is believed she will be sent to the Cape within the next few weeks. Sister Baptiste is now in the Milwaukee institution. She was located in that city for several years before she was sent to this city to take charge of St. Francis Hospital.

FOLK TO WIN SURE SAYS DR. FORSTER

St. Louis Democrat Predicts For-
mer Governor Will Lead
Spencer By 50,000

Dr. Otto E. Forster of St. Louis, formerly vice-president of the First National Bank, who has been in the city for several days looking after his business interests, predicts a sweeping victory for Joseph W. Folk over Judge Spencer this fall.

Dr. Forster, who was president of the St. Louis Police Board under Stone and Stephens, has been active in Democratic politics for many years.

"There is no doubt in my mind as to the outcome in the Senatorial contest," said Dr. Forster. "Gov. Folk will sweep the State. He will run well in St. Louis and he will virtually carry the country districts."

"I was for Mr. Folk in the primary, not because I had anything against Senator Wilfley. He is an estimable gentleman, but I supported Gov. Folk because I thought he was the man for the place."

"Missouri has always distinguished herself by electing her biggest men to the United States Senate. That is a good policy to follow, and the election of Mr. Folk will be in keeping with this record."

"I do not believe the Wilfley men will oppose Gov. Folk. I have talked to quite a few of them and they are for the ticket. Usually when the party speaks, the minority follows. Gov. Folk was nominated by a majority of Missouri Democrats, and it is the duty of all Democrats to support him. I am sure they will. And if Gov. Folk does not lead Judge Spencer by at least 50,000, I will be greatly disappointed."

Dr. Forster and Senator Stone were close personal friends for more than a quarter of a century.

AVIATION SITE IS SOUGHT NEAR CAPE GIRARDEAU

Commercial Club Executive
Committee Takes Up Move-
ment To Locate Army
Camp Here

COMMITTEE SELECTED TO LOCATE GROUNDS

Sam Sherman Asks For Sug-
gestions For Proposed Sites
Near This City

The Executive Committee of the Commercial Club yesterday took up the proposed aviation camp, which the War Department is willing to locate in this vicinity.

Major Giboney Houck, father of the movement, and who conferred with Secretary Baker concerning the project, appeared before the Committee and made his recommendations.

He told the Commercial Club members that he was confident that the War Department would favor Cape Girardeau, provided a suitable site could be obtained. He suggested two or three tracts of land within a few miles of Cape, which he said were suitable for aviation grounds.

Sam Sherman, D'Neen Stafford and Julien Friant were appointed a committee to work with Major Houck in selecting a site for the camp, after which a proposition will be made to the War Department.

Mr. Sherman stated last night that the committee would inspect a number of tracts in the vicinity at once. "I conferred with William A. O'Brien, the engineer, today, relative to a desirable location," Mr. Sherman said last night. "We agreed that N. C. Frissell, who probably is the best posted man in this part of the state on the location of Southeast Missouri land, should be asked to make some recommendations. He is familiar with aviation grounds, and his intimate knowledge of the land adjacent to Cape Girardeau makes him the logical man to locate the site."

"It is quite a problem to locate 640 acres in one tract that is suitable for aviation purposes. The committee would be glad to hear from anyone who knows of such a tract near Cape Girardeau. It doesn't matter if a portion of the land is in woods. The government will remove this."

"The principal requirement is that the land be level or nearly so, and it should be located upon a plateau. Such a location, I am sure, would meet with the government's approval. If the land is subject to overflow, it would not be considered favorable, because of the danger of impairing the health of the aviators."

"The Committee would be glad to hear from anyone who has a tract of 640 acres in a manner as I have described."

CHARLESTON MAN IS HELD AS BOOTLEGGER

Prisoner Asks Commissioner De-
munt if He Could Break
the Drouth.

Lawrence Meyer of Charleston, Mo., was arrested yesterday by United States Marshal Orchard on a charge of bootlegging. He is said to have been peddling whiskey to various parts of Mississippi County and to dry persons living in near by counties.

Deamont came to the Cape with Marshal Orchard and Meyer. The bootlegger whispered this message to the United States Commissioner: "I'm mighty dry; ain't you got something in your suit case to break the drouth?" The Commissioner informed him that there was nothing doing.

When they reached Cape Girardeau, Meyer was taken to jail. He will likely be given a preliminary hearing today.

The Right of Way

LILBOURNE MAN SLUGGED, IS DEAD

Ed Miller Succumbs At Hospi-
tal From A Fractured
Skull

Ed Miller, a resident of Lilbourne, who was brought to the hospital early Friday morning for treatment for a fractured skull, died about 9 o'clock last night.

Miller was brought to the hospital by a relative and Dr. Davis of Lilbourne. They said that Miller was struck on the head at the depot Friday night with a piece of timber from a transfer wagon frame. The name of his assailant was not learned. It is reported that Miller had a fist fight with the man who struck him with the piece of timber.

Miller has a sister in the city but no one at the hospital or any one connected with the case in any way knew her name and she could not be found last night. She visited Miller yesterday morning and had a child two or three years old with her. She did not leave any address or tell anyone her name.

Funeral arrangements had not been made early last night as none of the relatives had yet been heard from.

I. W. W. DYNAMITE CHICAGO U. S. BLDG

Four Men And One Woman Are
Killed And Many Hurt--
Arrests Made

Special Dispatch to The Tribune:
WASHINGTON, Sept. 4.—Five persons were killed and a score were injured this afternoon when a bomb was exploded under the Chicago Federal building.

The police are inclined to attribute the explosion to a plot planned by the I. W. W. leaders as a result of the sentencing of Bill Haywood and other I. W. W. members who were convicted last week for conspiracy. They were to have completed their application for an appeal in the Federal building today.

The Federal building was badly damaged by the explosion. Several arrests have been made by the police. Late tonight it was definitely learned that four men and one woman were killed in the explosion. Soldiers were rushed here tonight from Camp Grant to guard the Federal building. A large number of I. W. W. agitators were arrested tonight by the police and secret service men. A general order to round-up all known I. W. W. leaders was issued tonight.

HARRY RABE WILL REMAIN ON FORCE

City Fireman Agrees To With-
draw Resignation For
The Present

Harry Rabe, a member of the fire department, has agreed to stay on the job until a new man is found to take his place, the mayor told the city commissioners at a short session of the city council held yesterday afternoon. Rabe sent in his resignation the day before and it was expected that the council would act on it at the meeting yesterday.

It is not an easy job to find competent men for this work at a salary of from \$65 to \$70 a month, the mayor said. City Commissioner Frissell suggested that advertisements for help in the fire department be published and this was agreed to. Applications will be received by the city clerk and will be acted on at the regular meeting on the first Monday in October.

The City Engineer was given a leave of absence without pay until January 1, subject to recall at any time. The mayor said he thought he would be needed in about three weeks.

The mayor stated that he had granted the Barnes show the privilege of unloading on the river front between Themis and Independence streets. The paraphernalia of the show can then be hauled up Themis and Spanish to Broadway and from there to the Fairgrounds.

BANKERS ARE EXEMPT FROM MILITARY SERVICE

Crowder to Issue List of Essential
Industries Next Monday.

WASHINGTON, Sept. 4.—Much broader grounds for the establishment of claims for exemption from military service are provided in new regulations now being worked out by Provost Marshal-General Crowder to govern the classification of men who will register on Sept. 12. Important modifications are based upon the change of a few words in the original draft law made in passing the new man-power act. The term "industrial occupation" is eliminated, and the law now provides persons may be given deferred classification when engaged "in occupation or employment, including agriculture, which can be established as necessary to the military establishment or the maintenance of the national interest."

This section will allow district exemption boards to exempt bankers and essential bank employees, men engaged in necessary commercial enterprises and necessary workers for Red Cross and kindred organiza-

MAJ. CARMACK IS BACK IN THE U.S.

Officer Wounded In "No Man's
Land," Married Cape
Girardeau Girl

ST. LOUIS, MO., Sept. 4.—Major John Frank Carmack who married Miss Marie Weber of Cape Girardeau, who, in the casualty list of May 29 was named as severely wounded in action, was brought back to New York on a ship that reached there last Monday. This fact became known this afternoon, upon the arrival here of army officers who returned on the same ship.

Major Carmack, it was said, had to be carried from the ship. He was taken to a hospital in the East. Major Carmack, when war was declared, was Captain of I Company of the First Missouri Infantry. After his promotion he was transferred from the 138th Infantry to the 137th Infantry. He was shot in both legs when on an expedition in "No Man's Land."

EXCHANGE SEATS OWNED BY ALIENS ARE ORDERED SOLD

President Wilson Orders Them Dis-
posed of at Private Sale Without
Advertising.

Washington, D. C., Aug. 31.—President Wilson has issued an executive order authorizing the alien property custodians to sell at private sale, without public or other advertisement any seats or membership in stock, cotton, grain, produce or other exchange. By means of a private sale the order points out that seats or memberships may be sold to better advantage, at the place and time of most favorable demand and without unnecessary expense and delay.

INDICATIONS GOVERNMENT WILL COMMANDEER SUPPLY OF STEEL

40,000 Manufacturers Called on to
Make Reports of Stock to War
Industries Board.

WASHINGTON, Sept. 3.—More than 40,000 manufacturers using steel in their products have been called upon by the War Industries Board to make complete reports of their steel stocks, down to the smallest holdings.

It was intimated today that this step is preparatory to commandeering for war use all surplus supplies of steel.

Gen. Crowder will issue a list of the industries that he considers essential next Monday. The list contains sixty-nine classifications, including news papers and their appurtenances.

CARBURETOR IN SUMMER SEASON

Ordinarily There Is Not as Much
Gasoline Required Then as
During Winter.

USE OF COLD AIR ENTIRELY

Always Good Judgment to Inspect
Radiator Frequently, Making Sure
Water Is Not Running Low—
Grease Collects Dust.

One of the things demanding the attention of the auto owner in summer weather is the care of the carburetor. Ordinarily there is not as much gasoline required in hot weather as in cold and therefore, the dash adjustment may be carried a little nearer lean, or air, side. This not only saves gasoline but increases the power of the motor. In the majority of instances it has been found that the hot air stove of the carburetor may be dispensed with or adjusted.

Prevent Hot Air.

As a rule provision is made on the hot air stoves for allowing some cold air to enter, or to take cold air entirely. Where the carburetor is water-jacketed, it is usually supplied with a valve that may be closed to prevent the flow of hot water. Individual experience will determine whether it is advisable to cut out the heat entirely on the carburetor, since all are not benefited by the change. If the fan has been disconnected this of course will be corrected. The engine naturally runs hotter in the summer time, the water vaporizes faster and often boils away, so it is always good judgment to inspect the radiator frequently, making sure that the water is not running low. Water in the storage battery will evaporate twice as quickly in summer.

Heavy Grease for Summer.

Many manufacturers recommend a heavier grease for summer than for winter in order to obtain the greatest efficiency. Hot weather softens up grease and trouble often manifests itself by grease seeping out of transmission or differential cases, as well as from grease cups. When the grease softens in this manner it invariably makes a little ring of grease around each cup which collects dust and gives the car an unkempt appearance; there is also the possibility of some of the dust working into the bearings. Be sure to keep the grease cups turned down and in that way the dust is forced out. They should be wiped off carefully. It should be remembered that every bearing needs additional care in the hot weather to keep the dust out and the lubricant in, but the motorist who attends to these little "extras" will be doubly repaid in expense saved and in comfort and freedom from those annoying stops on the road which so often result in an unnecessary visit to the nearest garage. The motor-wise driver realizes from past experiences that hot weather calls for added forethought and precaution.

To Prevent Jumping Lever.

Unless you keep your hand on the gear shift lever until you are sure the gears are in mesh, it may jump back into neutral, bothering you greatly. It is a good plan to keep your hand on the speed lever until you have finished with it. Then, too, you must watch the road while you are changing from one speed to another, and you cannot do this if you have to look down and find the speed lever several times.

REVENUE BILL TO GO TO HOUSE TODAY

Committee On Ways And Means
Reports Measure-- To Be
passed Friday

Special Dispatch to The Tribune:

WASHINGTON, Sept. 2.—The \$8,200,000,000 revenue bill, to raise the necessary money for carrying on the war, was approved by the Ways and Means Committee today and the bill goes to the House tomorrow. Chairman Kitchen will ask to have the bill taken up Friday, and his present plans is to have the final vote taken Saturday. It is believed his program will be carried out.

MANUFACTURE OF BEER WILL STOP ON DECEMBER 1

Food Administrator Issues
Proclamation After Senate
Approves Dry Amendment

NATION WILL BE DRY BEFORE JUNE 30, 1919

Supply Of Liquor On Hand Will
Not Last Until Law Goes
In Effect

Special Dispatch to The Tribune:

WASHINGTON, Sept. 6.—The National Food Administration announced tonight that the manufacture of beer would be prohibited on and after December 1, 1918. Beer supplies on hand on that date may be sold without interference, but all breweries in the United States will either close on that day or be used in the manufacture of some other product.

The Food Administration order came a short time after the Senate had passed the Emergency Agricultural Stimulation bill with the bone dry rider. The prohibition amendment was approved by a vote of 46 to 6. Under the provisions of the measure, the nation becomes dry June 30, 1919, until the President declares by proclamation that the demobilization of the troops has been completed.

When June 30, arrives, according to the general belief, the United States will be accustomed to a bone dry diet. The manufacture of whiskey was discontinued almost a year ago and the supply since that time has been on a rapid decline. With the manufacture of beer stopped on the beginning of December, the nation will be virtually dry by the first of the year.

SOMEBODY IS GOING TO BE STUNG TODAY

Experts Are Going To Tinker
With Cape County Honey-
bees For Two Days

Professor Atkins of the College of Agriculture, Columbia, Mo., will be in the county September 4th and 5th. Four meetings have been scheduled and those interested should attend some of these meetings.

In Cape Girardeau County there is much bee pasture that is now going to waste. We are in the midst of a sugar shortage and the demand for sweets is unlimited. Honey in any form, chunk, comb or extracted commands a ready sale at very attractive prices.

Here is one kind of farming that does not involve ownership of land to operate. A back yard, an unused lot, a road side or a wood lot will make an ideal apiary. There are no state laws or city ordinances against the bee. This form of live stock can roam at will over both city and country. Nor does a river like the Mississippi offer a barrier to the bee. Bees from Cape Girardeau will gather honey in Illinois in the alfalfa fields across the river.

A very small amount of capital is necessary to get a start in the bee business. A few hives, a few tools like a veil and a smoker make up the necessary equipment. Neither does the bee require constant care like other forms of live stock. They can be left alone for weeks at a time.

If one will make bee culture a business, he can be assured of an income that will be equal to any other line of farming. Come out and hear what the State expert has to say and learn from him how to handle bees. The Wednesday meetings will be at 9 o'clock at the home of Seth Babcock, 741 North Henderson avenue, Cape Girardeau, and in the afternoon in Millerville at the school house. Thursday morning, 9 a. m., Pocahontas; 1 p. m., Fruitland; and Jackson 2 p. m., at the home of John Ade.
